

Ren Burnett

Results-driven fullstack developer skilled in JavaScript, React and agile methodologies. Leveraging six years of experience as a precision carbon-fiber repair technician, I excel in crafting high-quality code with attention to detail. Adept at fostering collaborative and empathetic team environments. Enthusiastic about learning new technologies and committed to building practical, user-focused software.

PROJECTS

James Hutt Games — Board Game Website

<https://jameshuttgames.com>

github.com/renburnett/jh_games_website_v2

Next.js, Google Sheets API, Tailwind for styling

EXPERIENCE

Moby Inc., Full Stack Developer — Edmonds, WA

mobyinc.com

github.com/mobyinc

SEPTEMBER 2021 - CURRENT

Contributing to several different projects with a range of frameworks and backends, the most prominent including Vue.js, React and Angular. Our backends are typically written in Node.js or Ruby on Rails. Typically “Craft CMS” is used to set up client portals.

Center For Learning, React and Rails Developer — Irvine, CA

c4academy.com

FEBRUARY 2021 - SEPTEMBER 2021

React/TypeScript frontend, Rails backend. Education application through which students can learn and acquire their High School diploma.

Banana App (BGP), React and Rails Developer — Seattle, CA

github.com/FoodIsLifeBGP/banana-rn

github.com/FoodIsLifeBGP/banana-rails

[banana app](#)

JANUARY 2020 - JANUARY 2021

React Native frontend written in TypeScript, Rails backend. Contributed to Banana App code base. Banana App is an open-source, not-for-profit project of The Be Good Foundation. Aim is to reduce hunger by simplifying the food donation process.

Microsoft/WTIA, Software Developer Apprentice — Redmond, WA

NOVEMBER 2017 - NOVEMBER 2018

Created a Bluetooth Radio Provisioning tool in C++ that is now used to set up mock peripherals for testing against the Windows OS for Bluetooth Quality Team. Wrote a Python script that ran daily to scrape customer reviews from online stores; data was made actionable after it was visualized in PowerBI.

Boeing, Composite Technician and Team Lead — Everett, WA

MARCH 2011 - APRIL 2017

Team leader of a fast-paced seven person Composite Repair Team. Interactions with teammates were professional, respectful and fun. Ensured that the majority of deadlines were met but not at the expense of quality work.
